Comprehensive Question Bank: Unit 8 — Digital Entrepreneurship

Section A: Multiple-Choice Questions (MCQs)

Topic 8.1: From Basics to Advanced Entrepreneurship

1. What is entrepreneurship, as defined in this unit?
A) Working for a large company
B) The process of designing, launching, and managing a business to create value
C) Investing money in the stock market
D) Studying business laws only
2. What is the main difference between basic entrepreneurship and digital entrepreneurship?
A) Digital entrepreneurship does not require any customers
B) Digital entrepreneurship uses technology to reach more people and manage operations
C) Basic entrepreneurship earns more profit
D) There is no real difference between them
3. Which of the following best describes "scalable digital entrepreneurship"?
A) A business that only sells in one local shop
B) A business that avoids using any technology
C) A business where systems handle growth without breaking under more customers
D) A business that has stopped growing
4. In the Airbnb origin story used in this unit, what was the founders' original problem?
A) They wanted to build a hotel chain
B) Hotels in San Francisco were fully booked during a conference
C) They wanted to sell air mattresses
D) They had too much rent money to spend
5. Which of the following is an example of Level 1 (basic) entrepreneurship on the "ladder" described in this unit?
A) A tailor taking only in-person orders and measurements
B) A tailor using an app for orders and payments
C) A tailor running automated marketing emails
D) A tailor using a CRM system

6. Moving a tailor's business from WhatsApp ordering to a full app with automated tracking and online payment represents a move to which level?
- A) Level 1 — Basic entrepreneurship
 - B) Level 2 — Digital entrepreneurship
 - C) Level 3 — Scalable digital entrepreneurship**
 - D) None of the above
7. Which of these is NOT listed as one of the advanced skills required for digital entrepreneurship in Grade 10?
- A) Legal compliance
 - B) Regulatory awareness
 - C) Avoiding all forms of marketing**
 - D) Structured problem-solving
8. Why does scale make mistakes more serious for a digital business?
- A) Digital businesses cannot make mistakes
 - B) A single mistake, such as a data privacy error, can affect thousands of customers at once**
 - C) Scaling removes all legal responsibility
 - D) Mistakes only matter for basic entrepreneurship
9. Fundamental digital tools introduced in Grade 9 include:
- A) Only physical shop counters
 - B) Social media platforms, e-commerce websites, and market research apps**
 - C) Only paper-based ledgers
 - D) Government tax forms
10. What core idea does the "ladder" analogy in Section 8.1 best represent?
- A) Increasing prices at every level
 - B) Delivering the same core value to customers through progressively better systems**
 - C) Removing customer contact entirely
 - D) Avoiding legal registration until the business is large
-

Topic 8.2.1: Structured Problem-Solving

1. What does structured problem-solving mean?
- A) Randomly trying different solutions until one works
 - B) Using a step-by-step approach to identify a problem, understand its cause, and choose the best solution**
 - C) Ignoring problems until they resolve themselves
 - D) Asking customers to solve the problem themselves

2. What is a "root cause"?
- A) The first customer complaint received
 - B) The real, underlying reason a problem is happening**
 - C) The most expensive part of the business
 - D) A type of marketing strategy
3. The "5 Whys" technique originated from which organization's factory culture?
- A) Google
 - B) Toyota**
 - C) Netflix
 - D) Airbnb
4. What is the main risk of only fixing the visible symptom of a problem instead of its root cause?
- A) The business will immediately shut down
 - B) The same problem is likely to happen again**
 - C) Customers will automatically trust the business more
 - D) There is no risk at all
5. In SWOT analysis, what does the "W" stand for?
- A) Wealth
 - B) Weaknesses**
 - C) Warnings
 - D) Work
6. Which SWOT category would "a new competitor entering the market" fall under?
- A) Strength
 - B) Weakness
 - C) Opportunity
 - D) Threat**
7. Which SWOT category would "high-quality products" fall under?
- A) Strength**
 - B) Weakness
 - C) Opportunity
 - D) Threat
8. In the 5 Whys example about declining online store sales, what was identified as the final root cause?
- A) Customers dislike the products
 - B) The store has too many products
 - C) The store never tests website updates on a slower internet connection before publishing**
 - D) The store has no marketing budget

9. What is the primary purpose of SWOT analysis?
- A) To calculate exact profit margins
 - B) To give an honest overview of a business's current internal and external situation**
 - C) To replace the need for any further decision-making
 - D) To design a company logo
10. How many times does the "5 Whys" method typically ask "Why?" to reach a root cause?
- A) Two
 - B) Three
 - C) Five**
 - D) Ten
11. Which of the following is an example of a business "Opportunity" in SWOT analysis?
- A) Slow customer service
 - B) A rival company launching a similar product
 - C) High demand for a new product**
 - D) Outdated packaging
-

Topic 8.2.2: Adaptability & Resilience

1. What does "adaptability" mean in a business context?
- A) Refusing to change no matter what happens
 - B) Being willing and able to change a business when conditions demand it**
 - C) Copying a competitor's exact strategy
 - D) Avoiding all risk permanently
2. What does "resilience" mean in a business context?
- A) Never making a mistake
 - B) Being able to recover quickly after a setback**
 - C) Ignoring customer complaints
 - D) Reducing the size of the business permanently
3. Netflix originally operated as which type of business?
- A) A video streaming platform only
 - B) A DVD-by-mail rental service**
 - C) A video dating website
 - D) A cinema chain
4. YouTube was originally created as what kind of platform?
- A) A news broadcasting service
 - B) A video dating site**
 - C) A music streaming app
 - D) An online bookstore

5. A shop that starts offering home delivery after noticing customers shifting to online shopping is demonstrating:
- A) Adaptability**
 - B) Resilience
 - C) A conflict of interest
 - D) Marketing automation
6. A bakery that improves its recipe and invites customers to try it again after receiving taste complaints is demonstrating:
- A) Adaptability
 - B) Resilience**
 - C) Structured problem-solving only
 - D) A data privacy breach
7. What is a "pivot" in a business context?
- A) A permanent shutdown of the business
 - B) A planned change in direction in response to a shift in the market or a sudden problem**
 - C) A type of marketing automation software
 - D) A legal document
8. In the pivot-planning walkthrough, which element of the business must NOT change even during a pivot?
- A) The delivery method
 - B) The core promise to customers**
 - C) The name of the company
 - D) The staff working hours
9. Which statement best reflects the psychological safety principle in this unit regarding business failure?
- A) Failure means a business should stop entirely
 - B) A failed product launch is market feedback that helps refine the business, not a personal defeat**
 - C) Founders who fail once can never succeed again
 - D) Failure should always be hidden from customers
10. Why did Netflix and YouTube's willingness to change their original business models matter?
- A) It had no real impact on their success
 - B) It allowed them to grow into globally successful companies by adjusting to what customers actually wanted**
 - C) It made their businesses smaller
 - D) It violated data privacy laws
-

Topic 8.3.1: Ethical Decision-Making

1. What does ethical decision-making mean in business?
 - A) Choosing whatever earns the most profit immediately
 - B) Making choices that are fair, honest, and responsible, even when another option is easier or more profitable**
 - C) Following only written laws and nothing else
 - D) Avoiding all business decisions
2. What is a "conflict of interest"?
 - A) A disagreement between two employees
 - B) A situation where someone's personal relationship or benefit could unfairly influence a business decision**
 - C) A legal contract between a business and a supplier
 - D) A type of marketing campaign
3. In the hiring example from this unit, what is the ethical solution when a shop owner's cousin and a more skilled stranger both apply for a job?
 - A) Automatically hire the cousin
 - B) Automatically reject the cousin
 - C) Let everyone apply, evaluate skills fairly, and hire whoever is best for the job**
 - D) Cancel the job opening entirely
4. Why should a business avoid using low-quality ingredients to cut costs while charging high prices?
 - A) It is always illegal
 - B) It harms customer trust and welfare, even if it increases short-term profit**
 - C) It is required by SECP
 - D) It increases long-term customer loyalty
5. What does "digital ethics" primarily involve?
 - A) Increasing advertising spend
 - B) Using the internet and digital tools responsibly, including keeping customer data safe and treating people respectfully online**
 - C) Avoiding all online business activity
 - D) Copying competitors' content
6. Which of the following is the ethical approach to balancing profit and customer welfare?
 - A) Maximizing profit regardless of product quality
 - B) Charging a fair price while using safe, good-quality products and honest information**
 - C) Hiding product defects from customers
 - D) Ignoring customer safety concerns

7. What should a business do to maintain safe online spaces, according to this unit?
- A) Ignore all customer comments
 - B) Set clear rules and take quick action against harassment or bullying**
 - C) Disable all online communication
 - D) Only respond to positive comments
8. Which of these is an unethical business practice, according to the unit's ethics discussion?
- A) Letting all applicants apply fairly for a job
 - B) Hiring a relative without giving other qualified applicants a fair chance**
 - C) Charging a fair price for good-quality ingredients
 - D) Publishing an honest ingredient list
9. What is the ultimate outcome of consistently following ethical decision-making, according to this unit?
- A) Lower short-term profit only
 - B) Earned respect and trust from customers, employees, and the community**
 - C) Guaranteed government funding
 - D) Immediate business failure
10. Which question is most useful for testing whether a business decision is ethical?
- A) Will this decision make the most money today?
 - B) Would I be comfortable if this decision were made public?**
 - C) Will competitors notice this decision?
 - D) Does this decision require any paperwork?
-

Topic 8.3.2: Responsible Marketing

1. What does responsible marketing mean?
- A) Using exaggerated claims to attract more customers
 - B) Promoting products and services honestly, with correct and complete information**
 - C) Hiding all product details from customers
 - D) Avoiding advertising altogether
2. In the school cafeteria example, what was the ethical problem with the "100% Fresh Fruit Juice" flyer?
- A) The flyer was too colorful
 - B) The advertised claim did not match the actual product being served**
 - C) The flyer used too many words
 - D) The flyer was too expensive to print
3. What must a business obtain before using a customer's personal data for targeted advertising?
- A) A tax filing

- B) Clear permission (consent) from the customer**
C) A trademark registration
D) A bank loan
4. Which of the following best reflects the rule of "truthful advertising"?
- A) Ads may exaggerate slightly if the product is good
B) Every advertisement must present clear, accurate information without hidden misleading conditions
C) Ads only need to be truthful if a customer complains
D) Ads can hide extra fees in small print
5. Why is trust described as a business's most valuable marketing asset?
- A) Trust cannot be lost once earned
B) Trust built through honest marketing keeps customers loyal and coming back
C) Trust replaces the need for a good product
D) Trust is not related to marketing at all
6. Which of the following ad lines follows the principles of responsible marketing?
- A) "Real fruit juice — no artificial flavors, made fresh every morning."**
B) "The best juice in the entire world, guaranteed to change your life!"
C) "100% organic" (when the product contains artificial additives)
D) "Limited stock!" (when stock is actually unlimited)
7. What should a business do if an advertisement includes special conditions, such as limited stock or extra fees?
- A) Hide the conditions in very small text
B) State the conditions clearly, not hidden or disguised
C) Remove the conditions entirely without informing customers
D) Only mention the conditions after a customer complains
8. What is the main purpose of responsible marketing?
- A) To maximize short-term sales regardless of accuracy
B) To help customers make informed decisions and build trust in the business
C) To eliminate the need for a marketing budget
D) To avoid targeting any specific customer group
-

Topic 8.3.3: Data Privacy Laws

1. What is the purpose of data privacy laws?
- A) To help businesses collect unlimited customer data
B) To protect personal information collected by businesses, such as names, addresses,

and payment details

- C) To increase advertising revenue
 - D) To eliminate the need for business registration
2. What does GDPR stand for?
- A) Global Data Privacy Regulation
 - B) General Data Protection Regulation**
 - C) Government Data Protection Rule
 - D) General Digital Privacy Requirement
3. Which law specifically protects the personal data of children under 13?
- A) GDPR
 - B) COPPA**
 - C) SECP regulations
 - D) The Patent Act
4. In Pakistan, which piece of legislation governs the protection of personal data collected by businesses?
- A) The E-Commerce Policy
 - B) The Personal Data Protection Bill**
 - C) The Companies Act
 - D) The Trademark Ordinance
5. According to the Personal Data Protection Bill, businesses in Pakistan must do all of the following EXCEPT:
- A) Collect only the information they need
 - B) Use information only for the purpose explained to the customer
 - C) Keep information safe and not share it without permission
 - D) Sell customer data to third parties for extra profit**
6. In 2019, Google and YouTube were fined \$170 million for violating which law?
- A) GDPR
 - B) COPPA**
 - C) Pakistan's Personal Data Protection Bill
 - D) The Patent Act
7. Why does GDPR matter to a Pakistani business that has customers in Europe, even though the business is based in Pakistan?
- A) GDPR only applies within Pakistan
 - B) GDPR applies to any business handling the personal data of people in European countries, regardless of where the business is based**
 - C) GDPR has no effect on businesses outside Europe
 - D) GDPR only applies to government organizations

8. What does "regulatory awareness" mean?
- A) Ignoring laws that seem inconvenient
 - B) Knowing which laws and rules apply to your business and staying updated as they change**
 - C) Registering a business only once and never checking again
 - D) Avoiding any legal registration
9. What is a "compliance audit"?
- A) A marketing campaign strategy
 - B) A process where a business is checked to confirm it is following all required laws and rules**
 - C) A type of customer loyalty program
 - D) A tax refund process
10. In the school portal example, which practice reflects good data privacy?
- A) Collecting students' home addresses even though the portal does not need them
 - B) Collecting only the data needed (name, roll number, contact details) and protecting it with passwords**
 - C) Sharing student data with advertisers
 - D) Storing data without any security measures
11. Which of the following is an example of personal data that a business should be cautious about collecting unnecessarily?
- A) Store opening hours
 - B) A customer's exact home address**
 - C) A product's price
 - D) A store's return policy
-

Topic 8.4.1: Business Registration in Pakistan

1. Which organization is the main authority for registering a new business in Pakistan?
- A) FBR
 - B) SECP**
 - C) IPO Pakistan
 - D) PTA
2. What does SECP stand for?
- A) State Economic Compliance Program
 - B) Securities and Exchange Commission of Pakistan**
 - C) Small Enterprise Certification Process
 - D) Standard E-Commerce Compliance Policy

3. What document proves that a business has been officially registered with SECP?
- A) National Tax Number
 - B) Certificate of Incorporation**
 - C) Partnership Deed only
 - D) Trademark Certificate
4. What is a Memorandum of Association?
- A) An agreement between business partners about profit sharing only
 - B) A document containing a company's basic details, such as its name, purpose, and location**
 - C) A tax filing document
 - D) A marketing plan
5. What is the primary purpose of the Articles of Association?
- A) To register a trademark
 - B) To set out the rules for running the company**
 - C) To calculate annual taxes
 - D) To list customer complaints
6. What does NTN stand for?
- A) National Trade Number
 - B) National Tax Number**
 - C) New Taxpayer Notice
 - D) National Trademark Number
7. Which government body issues the NTN in Pakistan?
- A) SECP
 - B) FBR (Federal Board of Revenue)**
 - C) IPO Pakistan
 - D) The Ministry of IT
8. Through which online portal can a business apply for an NTN?
- A) SECP Connect
 - B) Iris**
 - C) IPO Portal
 - D) Pakistan E-Commerce Gateway
9. Once approved, what does an NTN allow a business to do?
- A) Automatically register a trademark
 - B) Open bank accounts, issue invoices, and meet tax obligations**
 - C) Skip all future tax filings
 - D) Avoid registering with SECP

10. What is required of registered businesses regarding tax filing?
- A) Filing is optional if the business is small
 - B) They must file annual income tax returns and, if applicable, monthly sales tax returns**
 - C) They only need to file taxes once, at registration
 - D) Tax filing is handled automatically without any records
11. What extra requirement applies specifically to e-commerce businesses in Pakistan, beyond general registration?
- A) A patent application
 - B) Terms of service, a privacy policy, and return/refund rules under Pakistan's E-Commerce Policy**
 - C) A trademark for every product sold
 - D) A copyright for the business name
12. In the "E-bookHub" example, what was the first step Mr. X and Mr. Y took to register their business?
- A) Applying for an NTN
 - B) Choosing and getting a unique business name approved through SECP**
 - C) Filing their first tax return
 - D) Registering a trademark
-

Topic 8.4.2: Contracts in Digital Business

1. What is a contract?
- A) An informal conversation between business partners
 - B) A written or spoken agreement between two or more parties that is legally binding**
 - C) A type of marketing campaign
 - D) A government tax form
2. Which of the following is NOT one of the five basic elements of a valid contract?
- A) Offer
 - B) Acceptance
 - C) Popularity**
 - D) Consideration
3. In a contract, what does "Offer" mean?
- A) A discount given to loyal customers
 - B) One side promising to do something, such as sell a product or provide a service**
 - C) The final signed agreement
 - D) A dispute between two parties

4. In a contract, what does "Consideration" refer to?
- A) Being polite to the other party
 - B) Something of value exchanged between the parties, such as money, goods, or services**
 - C) A verbal apology
 - D) A business's tax obligations
5. What does the "Legal Purpose" element of a valid contract require?
- A) That the contract be written in legal language
 - B) That the contract be about something lawful**
 - C) That a lawyer must be present
 - D) That the contract be registered with SECP
6. What does "Consent" mean in the context of a valid contract?
- A) One party forcing the other to agree
 - B) Everyone agreeing willingly, without being forced or tricked**
 - C) A signature only, regardless of understanding
 - D) Agreement given only by the more powerful party
7. In the farewell party example, what represents the "Acceptance" element of the contract?
- A) Mr. X offering to arrange food and drinks
 - B) Mr. Y agreeing to handle decorations and music**
 - C) Both contributing Rs. 1,500 each
 - D) Both agreeing without pressure
8. Why are contracts considered important in digital business?
- A) They eliminate the need for trust between parties
 - B) They set clear terms for relationships and help prevent misunderstandings if disagreements occur**
 - C) They are only useful for large corporations
 - D) They replace the need for business registration
9. Which of the following can a valid digital business contract use?
- A) Only paper signatures
 - B) Either paper or electronic signatures**
 - C) Only verbal agreements
 - D) No formal agreement is needed
10. Contracts in digital business are commonly used for all of the following EXCEPT:
- A) Partnerships
 - B) Supplier agreements
 - C) Online transactions and terms of service
 - D) Determining a business's tax rate**
-

Topic 8.4.3: Intellectual Property Rights (IPR)

1. What do Intellectual Property Rights (IPR) protect?
 - A) Only physical office equipment
 - B) Creations such as inventions, books, songs, artwork, brand names, or logos**
 - C) Only government property
 - D) Customer personal data
2. Which organization handles IPR registration in Pakistan?
 - A) SECP
 - B) IPO Pakistan (Intellectual Property Organization of Pakistan)**
 - C) FBR
 - D) PTA
3. What does a trademark protect?
 - A) A new invention or method
 - B) Brand names, logos, or symbols used to identify goods or services**
 - C) A written book or song
 - D) A confidential recipe
4. What does a copyright protect?
 - A) A brand logo only
 - B) Original creative works such as books, songs, software, or drawings**
 - C) A business's tax records
 - D) A new mechanical invention
5. What does a patent protect?
 - A) A company's brand name
 - B) A new product, design, or method someone has created**
 - C) A customer loyalty program
 - D) A social media account
6. According to this unit, when is copyright protection given to a creative work?
 - A) Only after formal registration
 - B) Automatically when the work is created, though registration provides stronger legal protection**
 - C) Only if the work is sold commercially
 - D) Copyright does not apply to digital works
7. What historical example does this unit use to illustrate patent protection?
 - A) Airbnb's founders
 - B) Thomas Edison patenting the incandescent light bulb**
 - C) Toyota's 5 Whys technique
 - D) Netflix's shift to streaming

8. What is a "trade secret"?
- A) A publicly registered trademark
 - B) Private business information that gives an advantage, such as a recipe or customer list**
 - C) A government tax filing
 - D) A type of marketing automation software
9. What is a Non-Disclosure Agreement (NDA) used for?
- A) Registering a business with SECP
 - B) Legally binding employees or partners to not share confidential business information**
 - C) Filing annual taxes
 - D) Applying for a patent
10. If a competitor copies a business's logo and website content without permission, which legal protections are most directly relevant?
- A) Patent only
 - B) Trademark and Copyright**
 - C) NTN registration
 - D) SWOT analysis
11. Which of the following is required when applying for a trademark in Pakistan?
- A) A patent application form only
 - B) The name/logo, a description of goods or services, and the required fee**
 - C) A copyright certificate
 - D) An NDA signed by all employees
-

Topic 8.5.1: Data-Driven Marketing

1. What does data-driven marketing mean?
- A) Making marketing decisions based on guesswork
 - B) Making marketing decisions based on facts, numbers, and analysis**
 - C) Avoiding the use of any marketing tools
 - D) Copying a competitor's marketing strategy exactly
2. What does KPI stand for?
- A) Key Product Information
 - B) Key Performance Indicator**
 - C) Known Purchase Interval
 - D) Key Profit Index

3. What is the purpose of a KPI?
- A) To replace the need for a marketing goal
 - B) To measure specific progress toward a marketing goal**
 - C) To register a business with SECP
 - D) To draft a legal contract
4. What does ROI stand for?
- A) Return on Investment**
 - B) Rate of Information
 - C) Reach of Internet
 - D) Revenue on Ideas
5. In the bookstore example, spending Rs. 10,000 on Instagram ads and earning Rs. 25,000 in sales demonstrates:
- A) A failed marketing campaign
 - B) A positive ROI, confirming the campaign was successful**
 - C) A conflict of interest
 - D) A data privacy violation
6. Which tool is mentioned in this unit as helping a bakery identify which type of Facebook ad performs better?
- A) Zoho CRM
 - B) Google Analytics**
 - C) Mailchimp
 - D) HubSpot
7. What is the first step in running a data-driven marketing campaign, according to this unit's walkthrough?
- A) Running the ad immediately without a goal
 - B) Setting a specific, measurable goal**
 - C) Calculating ROI before any ads are run
 - D) Registering a trademark
8. Why is data-driven marketing considered better than guesswork?
- A) It always costs less money
 - B) It bases decisions on real evidence of what is actually working**
 - C) It removes the need for any marketing goals
 - D) It guarantees a business will never fail
9. Which of the following is an example of a measurable marketing KPI?
- A) The founder's personal opinion of the product
 - B) The number of website visits generated by an ad**
 - C) The color of the company logo
 - D) The business's registration date

Topic 8.5.2: Customer Relationship Management (CRM)

1. What is Customer Relationship Management (CRM)?
 - A) A method for filing business taxes
 - B) A way of managing all interactions with customers to build trust and long-term relationships**
 - C) A type of intellectual property protection
 - D) A legal contract format
2. What historical practice does this unit describe as the paper ancestor of modern CRM systems?
 - A) Toyota's 5 Whys technique
 - B) Shopkeepers keeping handwritten index cards of customer details and preferences**
 - C) Edison's patent filings
 - D) SECP business registration
3. In the sports shop example, how does the CRM tool help the business?
 - A) It automatically files the shop's taxes
 - B) It stores customer details and purchase history, allowing personalized messages when relevant stock arrives**
 - C) It replaces the need for a business registration
 - D) It designs the shop's logo
4. What is the purpose of a loyalty program, as described in the coffee shop example?
 - A) To reduce the number of returning customers
 - B) To reward repeat purchases and make customers feel valued, encouraging them to return**
 - C) To collect data without customer knowledge
 - D) To avoid personalizing communication
5. Which cloud-based CRM software is mentioned in this unit as being used by over 250,000 businesses worldwide?
 - A) Mailchimp
 - B) Zoho CRM**
 - C) HubSpot
 - D) Google Analytics
6. In the CRM loop described in this unit, what does customer data feed into?
 - A) Business registration
 - B) Personalization**
 - C) Patent applications
 - D) Root cause analysis

7. Why must customer data collected for CRM purposes still follow data privacy principles from Section 8.3.3?
- A) CRM data is not considered personal data
 - B) It still contains personal information, such as names and preferences, which must be collected and protected responsibly**
 - C) Data privacy laws do not apply to CRM systems
 - D) CRM systems are exempt from all legal requirements
8. What is the main benefit of building a customer data profile table, as shown in this unit's walkthrough?
- A) It replaces the need for a business's tax records
 - B) It allows a business to plan specific, personalized actions for individual customers**
 - C) It automatically registers a trademark
 - D) It eliminates the need for marketing entirely
-

Topic 8.5.3: Marketing Automation

1. What does marketing automation mean?
- A) Manually completing every marketing task one at a time
 - B) Using software to handle marketing tasks automatically, without doing each step manually**
 - C) Avoiding all forms of digital marketing
 - D) Registering a business with SECP
2. Which tool is described as automatically sending welcome emails and posting social media updates?
- A) Mailchimp**
 - B) Zoho CRM
 - C) Google Analytics
 - D) IPO Pakistan's registration portal
3. Which tool is described as tracking customer activity, sending follow-up messages, and creating performance reports?
- A) Mailchimp
 - B) HubSpot**
 - C) SECP's online portal
 - D) FBR's Iris portal
4. Which of the following is NOT listed as a benefit of marketing automation for small businesses?
- A) Saves time by handling routine tasks automatically

- B) Reduces costs by lowering the need for extra staff
 - C) Eliminates the need for any customer data collection**
 - D) Tracks campaign results to show what is working
5. In the automated customer journey walkthrough, what message is triggered when a customer creates a new account?
- A) A cart abandonment reminder
 - B) A welcome email/SMS, often including a first-order discount**
 - C) A final discount deadline message
 - D) A delivery confirmation
6. According to the abandoned cart journey map in this unit, what typically happens after a cart is abandoned for 2 hours?
- A) The customer's account is deleted
 - B) A gentle reminder message is automatically sent**
 - C) A final "last chance" message is sent
 - D) Nothing happens until 48 hours
7. What analogy does this unit use to explain marketing automation to students?
- A) A sports team agreement
 - B) Setting an alarm clock or an auto-reply message that works without you being present**
 - C) A handwritten customer index card
 - D) The 5 Whys method
8. Why is marketing automation especially useful for small businesses?
- A) It requires hiring many additional staff
 - B) It lets a business respond to customers consistently, even when the owner is unavailable**
 - C) It eliminates the need for any marketing strategy
 - D) It guarantees higher profits regardless of product quality
-

Section B: Short Answer Questions (SQs)

Topic 8.1: From Basics to Advanced Entrepreneurship

1. Define entrepreneurship as introduced in Grade 9.
2. Differentiate between basic entrepreneurship and scalable digital entrepreneurship.
3. Explain briefly how the Airbnb founders' original idea illustrates the starting point of digital entrepreneurship.
4. List the key advanced skills required for digital entrepreneurship at the Grade 10 level.

5. Identify one risk of scaling a business without strong legal or ethical foundations.
6. Explain briefly why the same core business value can be delivered through different "levels" of technology.
7. Predict what might go wrong if a business tries to scale (Level 3) without first testing its idea at Level 1 or 2.

Topic 8.2.1: Structured Problem-Solving

1. Define root cause analysis.
2. Differentiate between fixing a symptom and fixing a root cause.
3. State the four elements of a SWOT analysis.
4. Explain briefly the purpose of the "5 Whys" technique.
5. Identify which SWOT category "slow customer service" belongs to, and explain why.
6. Map out, in brief steps, how a business would use the 5 Whys method to investigate a sudden drop in customer sign-ups.
7. Explain briefly why guessing at a solution without root cause analysis can waste business resources.

Topic 8.2.2: Adaptability & Resilience

1. Define adaptability in a business context.
2. Define resilience in a business context.
3. Differentiate between adaptability and resilience using one example each.
4. Explain briefly how Netflix's original business model changed over time.
5. Identify one real-world sign that a business needs to pivot.
6. Explain briefly why treating a failed product launch as "market feedback" is healthier than treating it as a personal failure.
7. State the steps involved in building a basic pivot plan.

Topic 8.3.1: Ethical Decision-Making

1. Define ethical decision-making.
2. Define a conflict of interest, with one original example.
3. Differentiate between an ethical and an unethical hiring decision.
4. Explain briefly why balancing profit with customer welfare matters for long-term business success.
5. State what digital ethics requires of a business regarding customer data and online behavior.
6. Identify a question a business owner could ask themselves to test whether a decision is ethical.

7. Explain briefly the risk of prioritizing short-term profit over customer welfare.

Topic 8.3.2: Responsible Marketing

1. Define responsible marketing.
2. Explain briefly the two main rules of responsible marketing described in this unit.
3. Differentiate between a truthful advertisement and a misleading one, using an example.
4. Identify what a business must obtain before using customer data for targeted advertising.
5. Explain briefly why hidden conditions in an advertisement are considered unethical.
6. State why trust is described as central to responsible marketing.

Topic 8.3.3: Data Privacy Laws

1. Define data privacy.
2. Differentiate between GDPR and COPPA in terms of who they protect.
3. State the three main requirements of Pakistan's Personal Data Protection Bill.
4. Explain briefly the significance of the 2019 Google/YouTube COPPA fine.
5. Define regulatory awareness.
6. Identify what a compliance audit checks for.
7. Explain briefly why a Pakistani business with international customers must consider foreign data privacy laws.
8. Map out, in brief steps, how a school portal example follows good data privacy practice.

Topic 8.4.1: Business Registration in Pakistan

1. Define the role of SECP in business registration.
2. Differentiate between a Memorandum of Association and Articles of Association.
3. State the purpose of a National Tax Number (NTN).
4. Explain briefly the steps to obtain an NTN through the FBR's Iris portal.
5. Identify what additional legal documents an e-commerce business must add to its website.
6. Explain briefly why business registration builds trust with customers, banks, and suppliers.
7. Map out, in brief steps, the order in which a new digital business should complete SECP and FBR registration.

Topic 8.4.2: Contracts in Digital Business

1. Define a contract.
2. List the five basic elements required for a valid contract.
3. Differentiate between "Offer" and "Acceptance" in a contract.
4. Explain briefly what "Consideration" means in a contract, with an example.

5. Identify why "Consent" must be given willingly for a contract to be valid.
6. Explain briefly why written contracts are important in digital business relationships.
7. Predict what might happen to a business relationship if a contract lacks a Legal Purpose.

Topic 8.4.3: Intellectual Property Rights (IPR)

1. Define Intellectual Property Rights (IPR).
2. Differentiate between a trademark and a copyright.
3. Differentiate between a copyright and a patent.
4. Explain briefly how Thomas Edison's patent of the light bulb relates to modern IPR.
5. Define a trade secret, with one original example.
6. State the purpose of a Non-Disclosure Agreement (NDA).
7. Identify which government body in Pakistan handles trademark, copyright, and patent registration.
8. Explain briefly what legal protection a business should seek if a competitor copies its logo.

Topic 8.5.1: Data-Driven Marketing

1. Define data-driven marketing.
2. Define a Key Performance Indicator (KPI), with one original example.
3. Explain briefly how ROI is calculated conceptually.
4. Differentiate between making a marketing decision based on data versus based on guesswork.
5. Identify one analytics tool mentioned in this unit and briefly explain its use.
6. Explain briefly why setting a measurable goal is the first step in data-driven marketing.

Topic 8.5.2: Customer Relationship Management (CRM)

1. Define Customer Relationship Management (CRM).
2. Explain briefly how handwritten customer index cards relate to modern CRM systems.
3. Identify the four connected elements shown in the CRM diagram in this unit.
4. Explain briefly how a loyalty program helps retain customers.
5. State one way a CRM tool can help a business personalize communication with a customer.
6. Explain briefly why customer data collected for CRM must still follow data privacy rules.

Topic 8.5.3: Marketing Automation

1. Define marketing automation.
2. Identify two software tools mentioned in this unit that support marketing automation.
3. List three benefits of marketing automation for small businesses.

4. Explain briefly the alarm clock analogy used to describe marketing automation.
 5. Map out, in brief steps, what happens in an abandoned cart automation sequence at 2 hours, 24 hours, and 48 hours.
 6. Explain briefly why marketing automation helps a small business "show up" for customers consistently.
-

Section C: Long / Extensive Questions (LQs)

Topic 8.1: From Basics to Advanced Entrepreneurship

1. Analyze the progression from basic entrepreneurship to scalable digital entrepreneurship using the "ladder" concept described in this unit.
 - a) Describe what a business looks like at each of the three levels (basic, digital, scalable digital).
 - b) Using a local manual service of your choice, construct a detailed example of what that business would look like at each level.
 - c) Evaluate what new risks and responsibilities appear as a business moves up the ladder.
2. Discuss in detail why advanced digital entrepreneurship requires skills beyond the basic entrepreneurship concepts learned in Grade 9, referencing legal compliance, regulatory awareness, ethical frameworks, structured problem-solving, and strategic marketing.

Topic 8.2.1 & 8.2.2: Problem-Solving & Adaptability

1. Explain the process of problem-solving and adaptability as presented in this unit.
 - a) Describe Root Cause Analysis and SWOT Analysis as structured problem-solving tools, with an original example for each.
 - b) Construct a full 5-Whys trace for a business scenario of your choice, showing all five "why" questions and the final root cause.
 - c) Discuss how adaptability and resilience work together, using the Netflix and YouTube case studies as evidence.
 - d) Design a complete pivot plan for a business facing a sudden, unexpected disruption of your choice.
2. Evaluate the claim that "a business's biggest advantage is not avoiding problems, but having a structured way to respond to them." Support your evaluation using at least two concepts from this unit (e.g., root cause analysis, SWOT, adaptability, resilience).

Topic 8.3.1, 8.3.2 & 8.3.3: Ethics, Responsible Marketing, and Data Privacy

1. Write a note on ethical business practices and digital ethics.
 - a) Define ethical decision-making and explain the concept of a conflict of interest with an original example.
 - b) Analyze the balance between profit and customer welfare, discussing what happens to a business long-term if it consistently prioritizes profit over welfare.
 - c) Explain the two core rules of responsible marketing and construct one truthful and one misleading advertisement to illustrate the difference.
 - d) Discuss the key requirements of Pakistan's Personal Data Protection Bill, GDPR, and COPPA, and evaluate why a Pakistani digital business might need to comply with all three simultaneously.
2. Design a complete data privacy and ethics policy for a fictional educational app aimed at students under 13.
 - a) Identify what personal data the app should and should not collect.
 - b) Justify your choices using at least one law discussed in this unit.
 - c) Explain how your policy reflects both responsible marketing and ethical decision-making principles.
3. Evaluate a real or hypothetical case where a business ignored data privacy laws, ethical marketing, or fair decision-making. Discuss the consequences for the business's reputation, legal standing, and customer trust.

Topic 8.4.1, 8.4.2 & 8.4.3: Legal Framework & Compliance

1. Discuss in detail the full legal process of starting a digital business in Pakistan.
 - a) Describe the SECP registration process step by step, including required documents.
 - b) Explain how a business obtains an NTN through the FBR's Iris portal, and why this step matters.
 - c) Analyze the additional legal requirements specific to e-commerce businesses in Pakistan.
 - d) Construct a complete, realistic registration timeline for a new digital business idea of your own.
2. Construct a simple 4-clause digital service contract between two parties of your choice (e.g., a freelancer and a client, or two business partners).
 - a) Clearly label each clause: Offer, Acceptance, Consideration, and Legal Purpose/Consent.
 - b) Justify why each clause is necessary for the contract to be legally valid.
 - c) Discuss what could go wrong in the business relationship if one of these elements were missing.
3. Analyze the three main types of Intellectual Property Rights (Trademark, Copyright, Patent) and evaluate which type(s) would apply in each of the following situations, with justification:
 - a) A competitor copies your business logo.

- b) A competitor manufactures and sells a product using your patented invention process.
- c) A competitor republishes your original blog articles without permission.
- d) An employee shares your confidential customer list with a rival business.

Topic 8.5.1, 8.5.2 & 8.5.3: Strategic Marketing & Branding

1.
 - (a) Discuss how CRM and loyalty programs help in retaining customers.
 - (b) Explain marketing automation and describe its benefits for small businesses.
 - (c) Evaluate how CRM and marketing automation could work together in a single business system, using an original example.
2. Design a complete data-driven marketing campaign for a small digital business of your choice.
 - a) Set a specific, measurable marketing goal and identify at least two relevant KPIs.
 - b) Describe what analytics tools you would use and what data you would track.
 - c) Explain how you would calculate and interpret ROI at the end of the campaign.
 - d) Justify how your findings would influence future marketing decisions.
3. Construct a complete automated customer journey map for a new online business, from account creation through post-purchase follow-up.
 - a) Identify at least four distinct triggers (e.g., account creation, cart abandonment at 2 hours, cart abandonment at 24 hours, purchase completion).
 - b) Write the specific automated message for each trigger.
 - c) Evaluate the risk of over-automating customer communication, and explain how a business can avoid overwhelming its customers.
4. Analyze the relationship between data-driven marketing, CRM, and marketing automation as three connected strategic marketing tools. Discuss how a small business could use all three together to grow sustainably, using a real or original business example throughout your answer.
